IE Safe Supply

iesafe.supply

Anonymous Drug Checking Service

IE Safe Supply is designed to protect our participant's privacy.

We don't collect any personal information or any thing that can link a sample to you. We don't share any information about who we got the sample from with law enforcement or any other government agency.

We don't work with police or law enforcement in any capacity.

It's Legal!

Drug checking programs like IE Safe Supply are protected under California law. They are legal to use regardless of your parole or probation status. Drug checking programs are prohibited from providing personally identifiable information to law enforcement.

California Health and Safety Code sections 11014.5, 11300-11306, 11364, 11364.5 and 11364.7

Sample Collection Kit

Sample ID: So we can keep track of the sample, not you.

Sample Information Card: Optional information about the sample and your experience with it. Helps with community alerts and research.

Sample Vial: The sample is stored in a vial with a small amount of Methyl Cyanide (**Do Not Consume**).

Sample ID Card: Card with the ID on it so you can find it when the results are ready.

Collecting sample

The sample is stored in the sample vial, you are given the sample ID card, and we ask some optional questions about the sample to fill out the information card.

Samples can be **Residue**(from a bag, pipe, cooker etc), a **microscoop**(half a grain of rice), or part of a **crushed pill**. We can't take samples mixed with water.

Check your results

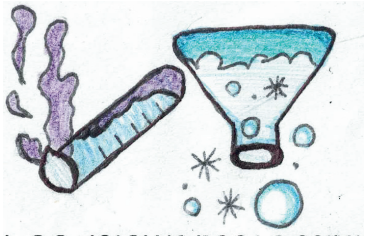

Anyone can visit iesafe.supply and enter in a sample ID or scroll through the results.

The results will list any active substances that were detected in the sample, including unexpected and potentially dangerous ones.

Lab Testing

IEHR takes the sample to the the lab. The lab runs the samples through a machine called a Gas-Cromatography Mass Spectrometer(GC-MS)

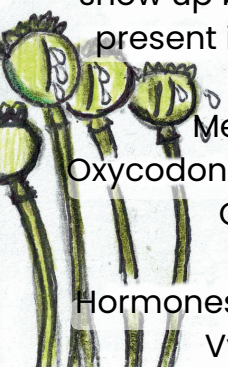

The technician interprets the results. They include what they detect and any notes they have. At this point the results can be seen on the website.

Limitations

GC-MS Drug Checking is extremely powerful and detects most active substances but has limits.

The following drugs may not show up but may still be present in the sample:

LSD
Mescaline
Oxycodone/Hydrocodone
Opium
7-OH
Hormones(like peptides)
Vyvanse
